

VCast Relative: Xane's Music Library

How to buy songs on your PC...

From the main screen of Xane's Music Library, either choose "Search By Artist" or "Song List."

And here's method #1... "Search By Artist"!

Search By Artist

Click the artist's name to view their albums which I have captured. Then, select an album name. It's as simple as that. You might just hear the singers of the song sing the title of the song on the CD. How nice is that.

Info: Click the headphones icon (🎧) to get a 20 second preview of the whole song, and you never know, you might just get a CD track instead...

And here's method #2... "Song List"!

Song List

Click on a song, then preview it. The thing basically lets you choose miscellaneous songs as well, if you know what I mean...

Info: Click the headphones icon (🎧) to get a 20 second preview of the whole song, and you never know, you might just get a CD track instead...

And that's that.

The way of VCast... Is this...
